

Batshi Home — Headless Storefront

Prepared 8 Sep 2026 Project batshi_sarusi Stage Phase 1 delivered Currency ILS, pre-VAT

A React storefront over the client's existing WooCommerce, plus a full technical audit. About **60–70% of a storefront replacement**: everything from catalog through cart, plus a checkout UI, minus payment, accounts, and domain cutover.

Bottom line: quote Phase 1 at ₪58,000 itemized (below). Floor ₪48,000. Phase 2 (go-live) quoted separately at ₪21,000–32,500. Your reconstructed day-rate value is ₪72k–84k — the itemization is already a quiet discount, so don't discount it again in the room.

THREE WAYS THE NUMBER CHECKS OUT

Triangulation

RECONSTRUCTED EFFORT	HOURLY CROSS-CHECK	ISRAELI SMB MARKET
₪72k–84k ~30 senior days × ₪2,400–2,800/day. This is your notional list price.	₪56,500 ~195 hrs × ₪290/hr. Lands almost exactly on the ₪58k anchor.	₪50k–65k Custom-store ceiling ~₪45–50k + premium for headless architecture & audit.

PHASE 1 • DELIVERED

Itemized by work area

WORK AREA	FEE
Discovery & technical audit 8 audit documents, plugin-by-plugin integration map with risk ratings, API inventory, route map, e-commerce flow, decisions log. De-risks every later phase.	7,000
Backend API & integration layer Express + TS proxy over WooCommerce Store API and WP REST: products, categories, brands, search, pages, banners, full guest cart with token/nonce forwarding, price normalization, caching, logging, Zod validation, unit + live tests.	13,500

Catalog, search & category system

13,000

Home discovery, catalog with filter / sort / pagination / prefetch, live search, 167-category tree reduced to a curated nav, SEO-preserving URL structure.

Product pages

6,500

PDP with variation matching against 624 variable products, image gallery, related products, stock & sale states from live data.

Cart & live shipping

7,000

Cart page + drawer, coupons, animated totals, optimistic updates, live PI SOL shipping rates and local pickup, skeleton states.

Checkout UI (no payment)

4,500

WooCommerce-parity checkout form, searchable Israeli-city select, shipping-method selection, order summary. Payment integration is Phase 2.

Design system, a11y, consent, mobile, SEO structure

5,000

Editorial RTL MUI theme, custom accessibility widget, cookie consent with Sourcebuster attribution, mobile-first chrome, responsive images, scroll restoration.

Deployment & handoff

1,500

Vercel + Render config, environment setup, health endpoint, README and run docs.

Phase 1 total**₪58,000****FLOOR**

₪48,000 if the client pushes hard — drop it by *cutting scope* (hand over checkout UI as-is, defer a11y-widget polish), never by cutting the rate. Below ₪42,000 you're working under market for headless work; walk or restructure as retainer.

PHASE 2 · NOT STARTED

Go-live — quote separately**Grow payment + headless checkout flow**

10,000–16,000

Range depends entirely on whether Grow's SDK supports a Store API flow or forces a hybrid Woo-checkout handoff.

Customer accounts	4,000–6,000
Login, order history, saved addresses. Skip if client accepts guest-only v1.	
Analytics & funnel tracking	3,000–4,500
GTM / GA4 / Meta, consent-gated, purchase de-duplication against real Woo orders.	
Staging, redirects & cutover	4,000–6,000
Staging environment, 301 map for ~3,400 product + 167 category URLs, DNS cutover, launch-week monitoring.	
Phase 2 total	¥21,000–32,500

Leverage: the audit already mapped every pricing / shipping / Shabbat / pre-order plugin. You're the only person who knows where the mines are. That knowledge is worth a monthly retainer once live — pitch ¥2,500–4,000/mo for maintenance + Woo-plugin drift.

THE ROOM

Negotiation notes

ANCHOR	Open at ¥58,000 for Phase 1, itemized. Let the itemization do the justifying — don't volunteer the day-rate math unless challenged, then cite ¥72k–84k as list.
IF FIXED PRICE WAS QUOTED	This is a change-order / scope-true-up conversation, not a fresh quote. The earlier number governs; bill the delta and Phase 2 forward.
IF OPEN-ENDED / T&M	The itemization above <i>is</i> the invoice. Present it as work completed, net-14.
PAYMENT TERMS	50% of Phase 1 on acceptance, balance net-14. Phase 2 only starts on a signed scope + deposit.
CLIENT PROFILE	"Wholesale prices" positioning = price-sensitive owner. Expect pushback on the total, not the line items. Hold the rate, trade scope.

DON'T GIVE AWAY

Source access / repo transfer until Phase 1 is paid in full. The audit docs especially — that's the reusable IP.

SUPPORTING THE NUMBER

What changed for the client

	OLD SITE	NEW STOREFRONT
Page weight	530 KB+ HTML, shop 650 KB+	Code-split SPA, prefetch, cached queries
Stack	Hello + Elementor Pro + ~15 Jet plugins	React + thin Express proxy
Navigation	167 categories in a mega-menu	Curated nav, full catalog still reachable
Design	Dated, text-link heavy, no alt text	Editorial RTL system, real a11y
Mobile	Desktop layout shrunk	Designed mobile-first
Admin workflow	100% WooCommerce	Unchanged — no retraining

Market context

- Israeli senior freelance day rate 2026: ₪2,000–3,800; hourly ₪250–450. Tel Aviv React freelance median ~\$117/hr.
- Israeli custom online store: ₪20,000–50,000+ — but those are Elementor/template WooCommerce, not headless React with a custom API layer.
- Global headless React storefront: **\$30k–50k low end, \$40k–150k mid-market**; agencies \$100–200/hr over 3–8 months.
- This project sits above a template build, below a finished enterprise headless build (no payment / accounts / cutover yet).

Codebase: ~10,000 LOC TypeScript (≈2,800 server / ≈8,500 client, excl. 1,300-line city dataset) · 34 commits · 8 audit docs.
